ControllerMES:

Full control for your production

The ControllerMES manufacturing management system from HOMAG provides a flexible package for optimum production planning, control and monitoring of production processes and ensures intelligent networking of all information flows in production.

AUTOMATIC BATCH FORMATION

- Orders reach production faster:
 - time saved in work preparation
- Fewer errors due to manual intervention
- Optimum batch size enables material savings
- Optimisation of production processes

AUTOMATIC STACK FORMATION

- No search times for components
- Effectively stacked components in the required production sequence
- Fewer logistics movements
- Less space required in storage and buffer areas
- For series and batch size 1 production: layering can be freely selected for each stack

FLEXIBLE HTML5 DASHBOARDS

- Complete and cross-area transparency over your production performance
- Simple operation and control
- Adaptations can be implemented in a highly flexible manner

Would you like to know what ControllerMES can do for your company? Our experts will be happy to advise you! Secure your appointment now for a free consultation at LIGNA. Your contact:
