Robot handling in a small space

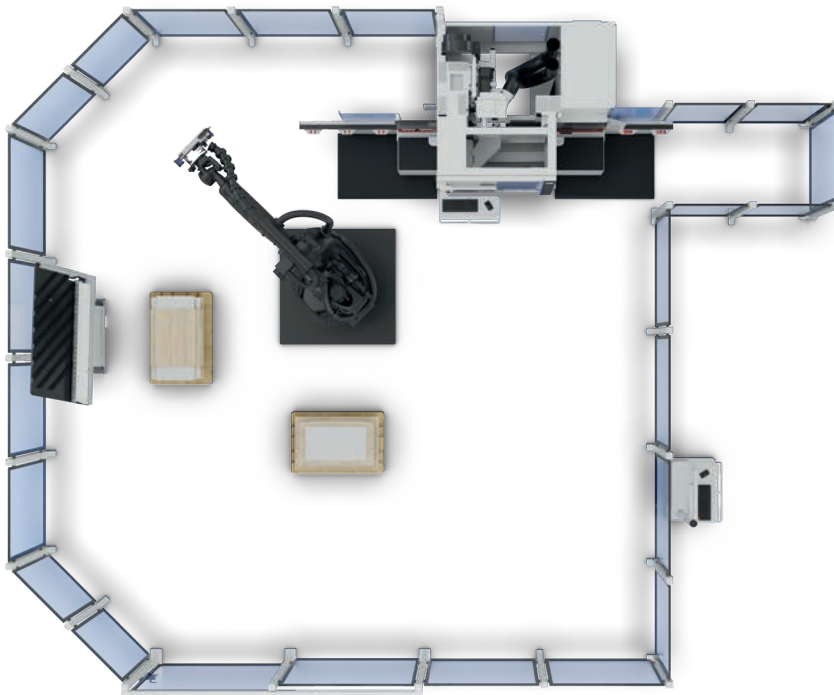

Your production becomes more flexible and agile with the support of the FEEDBOT D-300 BASIC and the firmly defined processes. The robot performs tedious and inconvenient tasks. Your employees are freed up for other value-adding activities.

What you need

- Hall height of at least 3,400 mm
- Installation area 9,960 mm x 6,000 mm when using a return conveyor

What we deliver

- Robot FEEDBOT D-300 BASIC with suction traverse and optional barcode reader
- Inclined plane for aligning the workpieces to the zero point
- Mobile operating terminal for controlling the DRILLTEQ V-500
- Smartpad for controlling the robot
- Protective grid for safe operation of the production cell

We will be happy to personally discuss with you the appropriate type of application for your machine.

We look forward to hearing from you.
